DETAILED ACTION

Election/Restrictions

1. Claims 2-4,7-10, and 12-34 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species of invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 1/6/06.
2. Applicant's election without traverse of Species II, Figures 5-6B in the reply filed on 1/6/06 is acknowledged.
3. Below is an action on the merits of claims 1,5,6 and 11 considered readable on the elected species as identified in the response filed 1/6/06.

Drawings

4. The drawings were received on 1/6/06. These drawings are approved.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of

elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: how the light reflection face of claim 1 cooperates with the light source and the light collection portion. It is unclear from the recitation in claim 1 whether the light reflection face in line 6 of claim 1 is part of the light collection portion or a separate element of the display like the light source or the display lightguide. Clarification is required. Claims 5 and 6 depend on parent claim 1 and as such are similarly rejected.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1, 6 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Thompson (4918578). Claim 1 as well as can be understood in view of the 35USC112 rejection set forth above recites a light source, a display lightguide in the shape of a display character, a light collection

portion between the light source and display light guide and a parabolic like reflection face having an axis perpendicular in a straight line to a light receiving face of the display lightguide. Thompson shows in Fig.6; a display lightguide in the shape of display character "43" with a light source in the U-shaped holder "46". The details of the U-shaped holder "46" are shown in Fig.1 as a light source "14" emitting light toward a lightguide "10" with a parabolic like reflective interior surface on the U-shaped channel "16" see col.4, lines 33-38. The details of the light source and light collection portion are shown in Fig.10 with a light source "80" and a light collecting portion in light refracting conduit "82" between the light source "80" and light receiving edge "85" of the display lightguide "84", see col.7, lines 60-68. Re claims 6 and 11, note that the light reflection face of Thompson as shown in Figs.1 and 6 is formed by moving a parabolic like curve in a direction perpendicular to the axis formed by a straight line perpendicular to the light receiving face "15" (Fig.1) of the lightguide thus creating a parabolic shaped channel.

Allowable Subject Matter

9. Claim 5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Collins (2207117) and Tyne (3497981) are cited of interest as showing display device using lightguides in the shape of display characters .
